CODEX

A Landmark Exhibition at the Intersection of Mathematics, Philosophy, and Fine Art

Robert Edward Grant · The Sphere Gallery · Laguna Beach, CA

The Sphere Gallery is proud to present **CODEX**, a landmark solo exhibition by polymath, inventor, and artist Sir Robert Edward Grant. On view from June 27 through July 13, 2026, at 278 Beach Street in Laguna Beach, California, the exhibition brings together an extraordinary body of original geometric drawings, sculptural objects, and models that translate ancient wisdom and universal mathematical principles into compelling visual form.

CODEX occupies a rare cultural territory — one where the rigour of number theory, the elegance of sacred geometry, and the intuition of the artist converge into a single, unified vision. Grant's work invites viewers to reconsider the boundaries between science and spirituality, between the measurable and the numinous, and between the language of mathematics and the language of art.

About the Exhibition

Drawing inspiration from the encrypted “mirror” scripts of Leonardo da Vinci, the proportions of the Vitruvian Man, and the profound geometry found throughout the natural world, Grant's **CODEX** series is the product of years of meticulous research and hand-drafting. Each work in the exhibition is executed with compass and pen on paper — a deliberate, meditative process that mirrors the methods of the Renaissance masters Grant so deeply admires.

The exhibition showcases Grant's discovery of novel geometric forms, including the **Granthahedron** and the **Enkehedron**, which have expanded the known family of polyhedra and their relationship to the structure of the universe. Alongside these geometric investigations, the works encode Grant's research in number theory — including his discovery of infinite and accurate prime number prediction — as well as his system of **Precise Temperament Tuning** (432.081 Hz), a novel musical temperament that aligns harmonic intervals with sacred geometric principles.

A sculptural model of Leonardo da Vinci's ornithopter — a flying machine conceived by the Renaissance master — anchors the exhibition, serving as a physical embodiment of the spirit of polymathic inquiry that unites Grant's practice across disciplines.

Exhibition Details

Exhibition Title	CODEX
Artist	Sir Robert Edward Grant
Venue	The Sphere Gallery, 278 Beach Street, Laguna Beach, CA 92651

Opening Reception	Saturday, June 27, 2026 · 5:00 – 9:00 PM
On View	June 27 – July 13, 2026
Gallery Hours	Monday – Saturday, 10:00 AM – 6:00 PM (or by appointment)
Contact	art@thespheregallery.com · +1 646 206 6237
Website	www.thespheregallery.com

A Note from the Gallery

*“Art should challenge the senses — make us pause, look again, and experience something unexpected. In Robert Edward Grant, we have found an artist whose work does precisely that, and more. **CODEX** is not merely an exhibition of drawings; it is a portal into a mind that refuses to accept the artificial boundaries between disciplines.”*

— Philippe Hoerle-Guggenheim, Founder & Director, The Sphere Gallery

Artist Biography

Sir Robert Edward Grant is a serial entrepreneur, polymath, prolific inventor, and thought leader whose work spans fields as diverse as medical technology, cryptography, sacred geometry, music theory, and consciousness studies. With over 80 patents to his name, Grant is recognized internationally for bridging the gap between science, spirituality, and innovation — applying his deep understanding of universal mathematical principles to solve problems across multiple industries.

Grant's professional career began in healthcare and medical technology, where he served as President of Allergan Medical and later as CEO and President of Bausch + Lomb Surgical. In 2012, he founded Evolus, developing Jeuveau as a competitor to Botox in the medical aesthetics industry. He subsequently founded AEON Biopharma, focused on therapeutic applications of botulinum toxin, and Crown Sterling, a company pioneering quantum-resistant encryption based on Quasi-Prime numbers.

As a mathematician, Grant has made significant contributions to number theory, including the discovery of Quasi-Primes and a method for infinite and accurate prime number prediction, the results of which are published at Cornell University's arXiv repository. His geometric discoveries — the **Granthahedron** and the **Enkehedron** — represent novel families of polyhedra that expand the known boundaries of three-dimensional geometry. He has also solved three historically “impossible” geometric problems.

As a musician and music theorist, Grant developed **Precise Temperament Tuning**, a system that aligns musical intervals with sacred geometric principles at 432.081 Hz. He is the best-selling author of **PHILOMATH**, **POLYMATH**, and **NEUROMINED**, and speaks English, Korean, German, French, and Japanese fluently.

In October 2023, Grant was knighted into the Order of Prince Danilo I of Montenegro. He was knighted a second time by Portugal in 2024. He is the 2023 recipient of the Lifetime Achievement Award in Business and Philanthropy from California State University, Fullerton. He holds a BA from Brigham Young University and an MBA (with Honors) from Thunderbird, The American Graduate School of International Management, and has attended the President's Seminar at Harvard Business School.

Robert Edward Grant lives and works in Laguna Beach, California.

About The Sphere Gallery

The Sphere Gallery was founded in 2015 in New York by Philippe Hoerle-Guggenheim — a third-generation art enthusiast whose passion for collecting was instilled by a family with deep admiration for the old masters and an insatiable appetite for the contemporary. Since its founding, the gallery has championed the crossover of street art and high contemporary culture, forging relationships with major figures including Richard Hambleton, Retna, Domingo Zapata, Peter Beard, Damien Hirst, and Eduardo Kobra, and placing their works into the most significant private and institutional collections in the Americas, Europe, and Asia.

In September 2025, The Sphere Gallery launched its permanent space at 278 Beach Street in Laguna Beach, California, continuing its vision of a refined yet dynamic cultural destination on the Pacific Coast. The gallery maintains international programming and collector relations in New York and Madrid. Philippe Hoerle-

Guggenheim has been profiled by Artnet News, The Daily Front Row, Resident Magazine, and the Wall Street Journal, and has spoken on the international art market at TEDx.

CODEX by Robert Edward Grant represents the gallery's commitment to presenting artists whose practices transcend conventional categories — uniting intellectual rigour, spiritual inquiry, and formal mastery in works of lasting cultural significance.
